Subject index

Activity coefficients
Activity coefficients of sodium bromide in alkaline earth bromides plus water systems at 298 K (Sarada et al.) 297
Ac voltammetry
Ac voltammetry for measurement of surface kinetics (Harrington) 21
Alkali metal salts
Alkali metal + macrocyclic ligand complexes in a 36 mass% mixture of propylene carbonate in dichloromethane (Salomon) 265
Ammonium amalgam
Voltammetric study of ammonium amalgam (Baranski, Lu) 205
Anionic clays
Oxometalate-clay-modified electrodes: synthesis and properties of anionic clays pillared by metatungstate (Keita et al.) 235
Aprotic solvents
Phase diagrams, molar volumes, heat capacities, conductivities and viscosities of some lithium salts in aprotic solvents (Perron et al.) 277
Arrhenius plots
Temperature dependence of symmetry factors and the significance of experimental activation energies (Damjanovic) 57
Azo dyes
Electrochemical and spectroscopic studies of Solochrome Violet RS (Ma, Johnson) 97

Chronocoulometry
Probing pyridine adsorbed at gold electrodes by chronocoulometry, radiochemistry and Raman spectroscopy (Lipkowski et al.) 147
Clay
Oxometalate-clay-modified electrodes: synthesis and properties of anionic clays pillared by metatungstate (Keita et al.) 235
Cobalt
Reversibility and irreversibility in the formation and reduction of oxide film states on Co at ambient and low temperatures (Šimpraga) 79
Complex formation constants
Alkali metal + macrocyclic ligand complexes in a 36 mass% mixture of propylene carbonate in dichloromethane (Salomon) 265
Composition–property relationships
Composition–property relationships for poly((3-methylthiophene)-co-(1-methyl-3-(pyrrol-1-ylmethyl)pyridinium)) electronically conducting ionomer films (Qi, Pickup) 133
Conducting ionomer films
Composition–property relationships for poly((3-methylthiophene)-co-(1-methyl-3-(pyrrol-1-ylmethyl)pyridinium)) electronically conducting ionomer films (Qi, Pickup) 133
Conductivities
Alkali metal + macrocyclic ligand complexes in a 36 mass% mixture of propylene carbonate in dichloromethane (Salomon) 265
Phase diagrams, molar volumes, heat capacities, conductivities and viscosities of some lithium salts in aprotic solvents (Perron et al.) 277
Copolymers
Composition–property relationships for poly((3-methylthiophene)-co-(1-methyl-3-(pyrrol-1-ylmethyl)pyridinium)) electronically conducting ionomer films (Qi, Pickup) 133

Dichloromethane
Alkali metal + macrocyclic ligand complexes in a 36 mass% mixture of propylene carbonate in dichloromethane (Salomon) 265
Differential pulse polarography
Electrochemical and spectroscopic studies of Solochrome Violet RS (Ma, Johnson) 97

Dipole–dipole interactions
The role of dipole–dipole interactions in the solvation of monoatomic monovalent ions in water on the basis of the mean spherical approximation (Fawcett, Blum) 253
Double-layer capacitance
Ac voltammetry for measurement of surface kinetics (Harrington) 21

Electrochemical reaction kinetics
Temperature dependence of symmetry factors and the significance of experimental activation energies (Damjanovic) 57
Electrodes
Oxometalate-clay-modified electrodes: synthesis and properties of anionic clays pillared by metatungstate (Keita et al.) 235
Electrode stability
In-situ study of electrode stack growth in rechargeable cells at constant pressure (Wilkinson, Wainwright) 193
Electrode stack growth
In-situ study of electrode stack growth in rechargeable cells at constant pressure (Wilkinson, Wainwright) 193
Electrohydrogenation
The electrohydrogenation of 2-iodonitrobenzene at mercury and Raney metal electrodes in aqueous methanol (Coté et al.) 219
Electrolytes
Activity coefficients of sodium bromide in alkaline earth bromides plus water systems at 298 K (Sarada et al.) 297
Equivalent-circuit analysis
Ac voltammetry for measurement of surface kinetics (Harrington) 21
Excess Gibbs energy of mixing
Activity coefficients of sodium bromide in alkaline earth bromides plus water systems at 298 K (Sarada et al.) 297
Experimental activation energies
Temperature dependence of symmetry factors and the significance of experimental activation energies (Damjanovic) 57

Force–displacement apparatus
In-situ study of electrode stack growth in rechargeable cells at constant pressure (Wilkinson, Wainwright) 193
Formation mechanism
Underpotential deposition of thallium(I) on electropolished copper in aqueous solutions (Berg et al.) 165

Gold electrodes
Probing pyridine adsorbed at gold electrodes by chronocoulometry, radiochemistry and Raman spectroscopy (Lipkowski et al.) 147
Growth–reduction cycles
Platinum oxide film formation–reduction: an in-situ mass measurement study (Birss et al.) 181

Heat capacities
Phase diagrams, molar volumes, heat capacities, conductivities and viscosities of some lithium salts in aprotic solvents (Perron et al.) 277
pH effects
Underpotential deposition of thallium(I) on electropolished copper in aqueous solutions (Berg et al.) 165
Hydride phase
Behaviour of a hydride phase formed in the hydrogen evolution reaction at a rotating Pt electrode: analysis of potential relaxation transients from a kinetic approach (Bai) 37
Hydrogen evolution
Behaviour of a hydride phase formed in the hydrogen evolution reaction at a rotating Pt electrode: analysis of potential relaxation transients from a kinetic approach (Bai) 37

Impedance theory
Ac voltammetry for measurement of surface kinetics (Harrington) 21
Interaction parameters
Activity coefficients of sodium bromide in alkaline earth bromides plus water systems at 298 K (Sarada et al.) 297
2-Iodonitrobenzene
The electrohydrogenation of 2-iodonitrobenzene at mercury and Raney metal electrodes in aqueous methanol (Coté et al.) 219
Ion adsorption–desorption
Platinum oxide film formation–reduction: an in-situ mass measurement study (Birss et al.) 181

Ionic conductivity
Composition–property relationships for poly((3-methylthiophene)-co-(1-methyl-3-(pyrrol-1-ylmethyl)pyridinium)) electronically conducting ionomer films (Qi, Pickup) 133

Kinetic analysis
Behaviour of a hydride phase formed in the hydrogen evolution reaction at a rotating Pt electrode: analysis of potential relaxation transients from a kinetic approach (Bai) 37

Lithium
In-situ study of electrode stack growth in rechargeable cells at constant pressure (Wilkinson, Wainwright) 193
Lithium salts
Phase diagrams, molar volumes, heat capacities, conductivities and viscosities of some lithium salts in aprotic solvents (Perron et al.) 277

Macrocyclic ligands
Alkali metal + macrocyclic ligand complexes in a 36 mass% mixture of propylene carbonate in dichloromethane (Salomon) 265
Mean spherical approximation
The role of dipole–dipole interactions in the solvation of monoatomic monovalent ions in water on the basis of the mean spherical approximation (Fawcett, Blum) 253
Metatungstate
Oxometalate-clay-modified electrodes: synthesis and properties of anionic clays pillared by metatungstate (Keita et al.) 235
Molar volumes
Phase diagrams, molar volumes, heat capacities, conductivities and viscosities of some lithium salts in aprotic solvents (Perron et al.) 277

Numerical simulation
Voltammetric study of ammonium amalgam (Baranski, Lu) 205

Overpotential deposition
Behaviour of a hydride phase formed in the hydrogen evolution reaction at a rotating Pt electrode: analysis of potential relaxation transients from a kinetic approach (Bai) 37
Oxide film states
Reversibility and irreversibility in the formation and reduction of oxide film states on Co at ambient and low temperatures (Šimpraga) 79
Oxometalate
Oxometalate-clay-modified electrodes: synthesis and properties of anionic clays pillared by metatungstate (Keita et al.) 235

Phase diagrams
Phase diagrams, molar volumes, heat capacities, conductivities and viscosities of some lithium salts in aprotic solvents (Perron et al.) 277
Pillaring
Oxometalate-clay-modified electrodes: synthesis and properties of anionic clays pillared by metatungstate (Keita et al.) 235
Plating morphology
In-situ study of electrode stack growth in rechargeable cells at constant pressure (Wilkinson, Wainwright) 193
Platinum oxide films
Platinum oxide film formation–reduction: an in-situ mass measurement study (Birss et al.) 181
Polybipyrrole formation
Observation of soluble pyrrole oligomers and the role of protons in the formation of polypyrrole and polybipyrrole (Raymond, Harrison) 115
Poly((3-methylthiophene)-co-(1-methyl-3-(pyrrol-1-ylmethyl)pyridinium))
Composition–property relationships for poly((3-methylthiophene)-co-(1-methyl-3-(pyrrol-1-ylmethyl)pyridinium)) electronically conducting ionomer films (Qi, Pickup) 133
Polypyrrole formation
Observation of soluble pyrrole oligomers and the role of protons in the formation of polypyrrole and polybipyrrole (Raymond, Harrison) 115
Potential relaxation
Behaviour of a hydride phase formed in the hydrogen evolution reaction at a rotating Pt electrode: analysis of potential relaxation transients from a kinetic approach (Bai) 37
Propylene carbonate
Alkali metal + macrocyclic ligand complexes in a 36 mass% mixture of propylene carbonate in dichloromethane (Salomon) 265

Pyridine adsorption kinetics
Probing pyridine adsorbed at gold electrodes by chronocoulometry, radiochemistry and Raman spectroscopy (Lipkowski et al.) 147
Pyrrole oligomers
Observation of soluble pyrrole oligomers and the role of protons in the formation of polypyrrole and polybipyrrole (Raymond, Harrison) 115
Pyrrole polymerization
Observation of soluble pyrrole oligomers and the role of protons in the formation of polypyrrole and polybipyrrole (Raymond, Harrison) 115

Quartz crystal microbalance
Platinum oxide film formation–reduction: an in-situ mass measurement study (Birss et al.) 181

Radiochemistry
Probing pyridine adsorbed at gold electrodes by chronocoulometry, radiochemistry and Raman spectroscopy (Lipkowski et al.) 147
Raman spectroscopy
Probing pyridine adsorbed at gold electrodes by chronocoulometry, radiochemistry and Raman spectroscopy (Lipkowski et al.) 147
Raney metals
The electrohydrogenation of 2-iodonitrobenzene at mercury and Raney metal electrodes in aqueous methanol (Coté et al.) 219
Reaction
Behaviour of a hydride phase formed in the hydrogen evolution reaction at a rotating Pt electrode: analysis of potential relaxation transients from a kinetic approach (Bai) 37
Reaction kinetics
Voltammetric study of ammonium amalgam (Baranski, Lu) 205
Rechargeable cells
In-situ study of electrode stack growth in rechargeable cells at constant pressure (Wilkinson, Wainwright) 193
Redox processes
Reversibility and irreversibility in the formation and reduction of oxide film states on Co at ambient and low temperatures (Šimpraga) 79
Reduction mechanisms
The electrohydrogenation of 2-iodonitrobenzene at mercury and Raney metal electrodes in aqueous methanol (Coté et al.) 219

Solid–liquid phase diagrams
Phase diagrams, molar volumes, heat capacities, conductivities and viscosities of some lithium salts in aprotic solvents (Perron et al.) 277
Solochrome Violet RS
Electrochemical and spectroscopic studies of Solochrome Violet RS (Ma, Johnson) 97
Soluble pyrrole oligomers
Observation of soluble pyrrole oligomers and the role of protons in the formation of polypyrrole and polybipyrrole (Raymond, Harrison) 115
Surface kinetics
Ac voltammetry for measurement of surface kinetics (Harrington) 21
Symmetry factors
Temperature dependence of symmetry factors and the significance of experimental activation energies (Damjanovic) 57

Tafel slopes
Temperature dependence of symmetry factors and the significance of experimental activation energies (Damjanovic) 57
Temperature dependence
Temperature dependence of symmetry factors and the significance of experimental activation energies (Damjanovic) 57
Thallium(I)
Underpotential deposition of thallium(I) on electropolished copper in aqueous solutions (Berg et al.) 165
Thermodynamics
Activity coefficients of sodium bromide in alkaline earth bromides plus water systems at 298 K (Sarada et al.) 297
Transients
Behaviour of a hydride phase formed in the hydrogen evolution reaction at a rotating Pt electrode: analysis of potential relaxation transients from a kinetic approach (Bai) 37

Underpotential deposition
Underpotential deposition of thallium(I) on electropolished copper in aqueous solutions (Berg et al.) 165

Viscosities
Phase diagrams, molar volumes, heat capacities, conductivities and viscosities of some lithium salts in aprotic solvents (Perron et al.) 277
